

Report on Educational Initiatives (EI) Cares

Educational Initiatives (EI) Cares is a program designed to support and promote various educational initiatives aimed at improving learning outcomes and fostering holistic development among students. Through this program, Educational Initiatives strives to address key challenges in the education sector and contribute positively to the academic journey of students.

This year, in the session 2023-24, we introduced EI Cares. EI Cares is an assessment tool that formulates customized assessment programs aligned with the school curriculum and provides immediate, detailed feedback on individual student performance. This initiative perfectly aligns with the New Education Policy 2020, with a key focus on skill-based and competency-based assessment for grades 6 to 9 in key curricular areas such as English Language, Mathematics, Social Science, and Science, with a total student strength of 484 in the session 2023-24.

Following the CBSE guidelines and curriculum, all assessments were designed from Periodic Tests to Half-Yearly and Final Exams, with detailed performance report cards provided for both students and teachers.
